AND THE SOUTH LONDON SCHOOL OF PHARMACY** book.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 94 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1887 edition. Excerpt: . . . are small loaded bulbs of known specific gravities, which are thrown into the liquid to be tested, when the number marked upon the bead, which just floats underneath the surface and shows no tendency to sink or rise, gives the specific gravity required. Hydrometers in any form must in accuracy rank considerably beneath that of the specific gravity bottle; but in commercial operations, where an approximation only to correctness is required, these little instruments are invaluable. SPECIFIC GRAVITY. tak 99 w Case 3. To take the specific gravity of a liquid by weighing a stflid hody in it. --Take the weight of a glass stopper, or other suitable plummer. -. by suspending it from the hook provided for the purpose in all balances of t-. modern type (see fig. 12, page 6). Put a wooden stool (also provided with v all modern balances) over the pan, and upon this place a beaker containing distilled water at 60 F. Let the plummet hang beneath the surface of the water and again weigh, and then empty out the water, substitute the fluid (also at 60 F.), immerse the plummet as before, and once more weigh. By deducting respectively the weights in water and in fluid from the weight in air, we get the loss of weight sustained by the plummet in each case. It is evident that the lighter the liquid, the more the plummet will weigh; therefore we divide the loss of weight in...
