Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from *Industrial Fuel and Power: Papers and Discussions Presented Before the Affiliated Technical Societies of Boston, December 10 and 11, 1925* The object of this paper is to make a brief survey of the supply of fuel which is available to us in the United States, and to show the rate at which we are using these supplies. These fuels include natural gas, oil, anthracite and bituminous coal; and of course water power must be considered as a substitute for the fuels. Our supply of natural gas, once so plentiful, has been used with no thought of conservation, and as a result, to all intents and purposes, it is today practically exhausted. The use of natural gas is now a negligible factor in power production. Once we had so much of it that it was considered economy to leave the gas street-lights burning all day rather than to go to the expense of turning them off in the morning and lighting them again in the evening. This is merely one indication of how we threw away this natural resource. From many standpoints gas is an ideal fuel. Its chief advantage lies in the fact that it can be so intimately and accurately mixed with the air required for combustion. It is easy to see that two gases, such as natural gas and air, can be mixed much better than is the case with a liquid and air or a solid and air. Now that the natural gas has gone, it does no good to wish that we had it back again, and the only course open to us is to be economical in the use of...
