Springer. Paperback. Book Condition: New. Paperback. 403 pages. Dimensions: 9.1in. x 6.1in. x 0.9in. Biomolecular computing is an interdisciplinary field that draws together molecular biology, chemistry, physics, computer science, and mathematics. DNA nanotechnology and molecular biology are key relevant experimental areas, where knowledge increases with each passing year. The annual international meeting on DNA-based computation has been an exciting forum where scientists of different backgrounds who share a common interest in biomolecular computing meet and discuss their latest results. The central goal of this conference is to bring...
